Dear Mr Raghavendra Row,

I am sending you my Inspection notes on the various places we inspected at my visit to Mysore on 8th and 9th instants If you will kindly let me have surveys with the details asked for, I shall prepare the required plans for you Most urgently I want the correct alignments of the Dodkere Tank and Nilgiri Road at the corner near the Gunshed together with the triangular space and Police Station as also the two old Burial ghauts

Yours sincerely,

Architect & Townplanner

INSPECTION NOTES FOR MYSORE

Government Work

10th - 12th March 1942

1) Vontikoppal Circle The lay-out as marked is alright. The outer radious of the circle has been reduced as marked on the spot and the circle extends to include portion of the compound N E.

2) The whole Vally between the Radio Station and Sayaji Rao Road requires to be correctly surveyed and contours shown in order to prepare a lay-out plan as desired by the Dewan

3) The Diversion Road to the under bridges south of Station should be made a true curve without any kinks in it.

4) The junction of the new road between Hospital and Veternary Dispensary requirs planning and a correct survey may be prepared including the area to Sayaji Rao Road

5) The proposal to add to the shop front of the Temple in Dodpet road is not recommended, rather should the shop be set back to the original limit.

6) The footpaths to the road near Croton Lodge should be lined out and marked as also the limit of the proposed building opposite the Hotel

7) The Santhepet shop area requirs extension This will be planned as soon as the survey mentioned in para 2 is received

8) The Pampart Road should have its final width marked as there are still some kutcha houses to be removed which in one place at the eastern end I noticed a compound wall being built.

INSPECTION NOTES ON GOVERNMENT WORK
MYSORE, 8th & 9th August, '41

Statue Sites

1) As the site in front of East Gate is not approved, I inspected other possible sites

2) I Gordon Park -- West of the Oriental Library there is a large semicircular plot (A) When the Road coming from Jaganmohan Palace is made straight up to the Oval there will be a similar semicircular plot(B) formed by the approach Roads to the Public Offices The central part of the present oval (C) will then be a large rectangular plot with the proposed Assembly Hall to the west of it (A) and (B) would be suitable sites for Open Statue and (C) for a Statue with Canopy The nature of the surrounding Building however is hardly appropriate for either His Late Highness or H H the Yuvaraja Statues, so that these sites do not seem useful for the present need

3) II The Elgin Fountain -- This site has been suggested and would be quite suitable if an effective lay-out is possible If a correct survey of this area, including the Lansdown Bazaar, the Park Gates, Mission School and adjoining area of Curzon Park is prepared, I shall try and see whether an effective lay-out is possible

4)III The Jaganmohan Palace Garden -- It was His late Highness intention some years ago that the Marriage Hall be removed to any place where it would be of utility for the Public and to restore the original garden I made plans to re-erect it as a Theatre and Public Hall on the Curzon Park Road between the English Club and Electrical Office where the new Cinema is now situated One or two senior officials were against the removal on sentimental grounds and the matter was shelfed

If however this proposal was again taken up, the centre of this large Garden with the beatiful frontage of the Palace and an improved approach Road would make an ideal site for the Statue with Canopy Until however the proposed new Assembly Hall is built this alternative must, I fear, be barred

5) IV The Southgate Approach -- This I then consider the most suitable site for His late Highness Statue It commands a prominent and well frequented position and permits a spacious and effictive lay-out quite in harmony with the Statue Square in front of the Northgate The temples near the gate can easily be treated architecturally as wing to the gate The Railings on either side of the area can, if necessary, even be set back to widen the area Only on the southern end ~~a~~ the present Dharmasala (old Karohatti) must be partly removed and replaced by a semicircular architectural feature as is already shown in my plan at the present lay-out I will make a fresh design of the whole scheme as soon as I get the plan of the present lay-out

6) The Stadium -- The correspondence regarding this having been received from the Government Architect, I had called for my plan of the lay-out of the Dodkere Tankbed and inspected the place with the President, Municipal Council (as also all the places noted below) I explained that the cost of a Stadium inside the Tankbed would be prohibitive and the only practical Solution is to locate it with the western long side on the margin of the Bund Road (Nilgiri Road) between the two abandoned Burial ghats Here the high banks admit of a comparatively cheap construction of 12 to 15 sitting-steps with a covered sitting place and end-Pavilions at top and in level with the Road

The other 3 sides would only have 3 or 4 steps built up of earth and turfed with a plain creeper pergola at top both for shade and as an eclosure to the Stadium

I submitted the plan to His Highness who quite approved I mentioned that the Jeevarayan Tankbed, which also has high

RST

high Banks, was mentioned as an alternative site but this His Highness did not approve My plan also shows the lower (southern portion of the Tank under water and I explained that under the Bridge of the proposed Chord Road,where it crosses the surface water channel,sluicegates were proposed so that after the first Monsoon rain had cleaned the channel, the gates could be closed and a portion of the tank refilled and if at any time the water was objected to it could be let out by merely opening these sluicegates His Highness was pleased to say that this should be done if possible as it would improve the Landscape and afford fecilities for Boating

7) New Bannimantap Road -- This is a deviation from the original plan due to the Slaughter House having been placed without reference to plans The new portion between the straight Roads (Syajee Row Road and that to the South of Bannimantap) must form a true even curve otherwise angularities will show when the sides are levelled

8) New Santhipet Road -- I was unaware of this cheme until already 3 or 4 buildings were erected I even then advised that a convenient Road should be laid out along the back of the buildings so that all carts could be unloaded there Now however further godowns are put at the back and all traffic is confined to the front Road

9) To minimise the confusion the Road may be widened and divided in two halves, the outer being for moving carts and the inner for unloading the halting carts The lamps should be in the Centre

10) The wider space between the shops and Syajee Row Road can unfortunately not be built on to remedy the insufficiency of space for further shop requirements It should however be laid out and crossroads provided A plan with levels or contours may be sent to me

11) The Bus-Stand will come within this lay-out and proper approaches provided

12) Junction of Summar Palace and Zoo Road -- The question is the improvement or acquisition of Mr house at the Ittigegud corner of this junction The House forms a dangerous corner, obscures Traffic and the improvement of the junction is only possible after its removal which is an urgent necessity plan of the present junction may be sent to me to work out its logical lay-out

13) The site pointed out forthe proposed middle school at Ittigegud is not suitable on sanitary grounds, as the place is too low and the sub-soil may at times be waterlogged

It may be placed on the higher ground to the East of the Road where there is also room for the necessary play ground

14) The proposed deviation of the old Nilgiri Road near the Sewage Farm is quite practicable In theplan it is a little too abrupt but if the starting point and its junction with the new Nilgiri Road are kept as pointed out on the site it will be alright

15) When the area thus gained is incorporated with the Sewage Farm it should be planted with permanent crops such as Sour Limes, Papeya etc , which only require periodical watering as frequent watering of short season crops with sewage may cause objection on account of the immediate proximity of the Nilgiri Road

16) The Sewage Farm has been well developed The cocoanut avenue should be extended The Rhodes grass should be replanted in rows so that watering can be done in furrows instead of flooding the whole area, which is liable to make the land sewage-sick

The showroom is a good idea If plan and section is sent to me, I will give a sketch of the fitments

17) Proposed circle south of Vanivilas Market -- Ths site is not suitable for a circle as it would involve acquisition of one or two large shops

It should be laid out as a true Square and shifted further south so that the new Cinema will form one side, the other three sides will be suitable for good shop fronts The space left between this Square and the Market can also then be used for shops or other Building sites When the plan showing old houses with those already put under acquisition is returned to me, I shall work out the whole lay-out

18) The Vanivilas Road Circle -- This also cannot be made a full circle as none of the crossing Roads are opposite to each other1 and the Syajee Row Road takes up the whole of one Quadrant

The garden to the north should be left and to the north and west some of the old houses turned into good shop fronts The Quadrant on the South-East will be treated Square to confirm to the proposed shop front on the north Details of the existing surrounding houses may be given to complete the lay-out

GENERAL SECRETARY 14 NOV 1941

Sir,

Adverting to your letter No L.3322 of the 31st October 1941, enclosing Mr Krumbiegal's inspection notes for necessary action, I have the honour to state as follows

1 Regarding site for statue of His Highness the late Maharaja All the information required by Mr Krumbiegal has been furnished.

2. The Stadium The proposals regarding this are being dealt with by the Public Works Department All information required by Mr Krumbiegal has however been furnished

3 Para 7 of Mr Krumbiegal's note - New Bannimantap road The suggestion of Mr Krumbiegal to form a true curve of the new portion between the straight roads, i e Sayyaji Rao road and that to the south of Bannimantap is being attended to.

4 Para 8 of Mr Krumbiegal's note - New Santhepet road etc The suggestions that a convenient road should be laid out along the back of the new Santhepet buildings, the widening of the road and dividing it into two halves, the outer for moving carts etc referred to in paras 8 to 12 of Mr Krumbiegal's note are noted and necessary plans will be drawn up.

5 Para 13 of Mr Krumbiegal's note - As regards the site for the proposed middle school at Ittigegud the site on the higher ground to the east of the road referred to in the note has already been selected and approved

6. Para 14 of Mr. Krumbiegal's note The deviation road near the Sewage Farm has now been formed.

7 As regards paras 15 to 16 dealing with the improvements to Sewage Farm, the matter is being examined by the Health department of the Municipality and action taken will be reported in due course.

8 Para 17 of Mr Krumbiegal's note. As regards the improvements near the Vani Vilas market, I have already sent the site plan with necessary details, to Mr. Krumbiegal.

9 Para 18 of Mr. Krumbiegal's note As regards putting up some good shops in place of the old houses to the north of the Vani Vilas road circle, action is being taken in correspondence with the owner of the said old houses.

I have the honour to be,
Sir,

SECY LAW DEPT
1 DEC 1941
GOVT OF MYSORE

Inspection Notes taken on 22nd and 23rd November at Mysore on Government work (Continued from Palace work)

---

1 Gandhi Square to Croton Lodge The details of existing boundary walls and building to be correctly surveyed to prepare lay-out plan

2. Vani Vilas Circle Surrounding houses were inspected Mr Siddappa has agreed to rebuild his shop and improve the elevation of his house facing the circle marked A B C in the plan separately sent, the design to match the Municipal Market -

3 Mr Manjundappa has agreed to build the frontage of the new shops (C D) in the style of the Co-operative building

4 This style should be maintained all round the square and Mr Rajagopalaiyengar has also agreed to adopt this style for his building at (F) and my approval to the design submitted by him is cancelled -

5 Likewise when the shops at (E) are being rebuilt they should be in the same style -

6 There seems to be a mistake in the survey sent as it shows no foot-paths on this road and the plan in this part must be modified showing proper width of road with the foot-path

Motilal Cinema Square and Market Extension --

7 coloured plan has now been sent The owner of shop -

of shop marked (I) has promised to improve the bare well facing the square If a sketch of this side elevation is sent I wil give a design

8 The Buildings marked II should be as much as possible of a uniform design Those marked III are of course simply - extension of the market The block IV can be of an - independent design

9 Philomena School The site for this has been selected and a complete survey of the vacant lands both sides of the Main Road from Government House north gate to Forbes Transformer House has been asked for from Municipal Engineer

10 Extension A survey plan of this has also been promised to be sent, when received I shall give further details
